

HOW TO MEASURE FOR YOUR PCA SCREEN DOOR

DIRECTIONS

1. Measure opening **WIDTH** between brick moldings. (NOT BETWEEN JAMB!)
2. Measure opening **HEIGHT** from bottom of overhead brick molding to top of threshold.
3. Measure existing door **KNOB HEIGHT** from threshold.
4. Determine **DOOR SWING**. Standing outside looking in, if the hinge is on the left it is a left hinge, if it is on the right it is a right hinge.

WIDTH: _____

HEIGHT: _____

KNOB HEIGHT: _____

DOOR SWING: _____
